BitRaser Mobile Diagnostics

Hardware Diagnostic Software
for iOS & Android Devices

Ultimate Solution to
Diagnose Smartphones.

BitRaser Mobile Diagnostics enables mobile service providers, retailers, mobile repair shops etc. to efficiently detect and find source of device issues before selling them.

This mobile diagnostics software enables quick identification of mobile phone problems for any device running on iOS and Android.

It accurately analyzes device's performance and enables retailers to maximize their returns from refurbished devices.

Technology you can TRUST

BitRaser is an innovation by Stellar, the global data recovery experts trusted by millions since 1993. BitRaser is created after applying decades of learning of our data recovery research, development and engineering experts.

A robust software to test functionality of smartphones

A software to determine hardware health of mobile devices, such as smartphones & tablets running on iOS and Android. BitRaser Mobile Diagnostics software helps determine the health status of various components such as Battery, Camera, Touchpad, Display, Microphone, SIM Card Slots, RAM, Internal Memory etc. of a mobile device.

BitRaser Mobile Diagnostics Capabilities
